Exercise 3
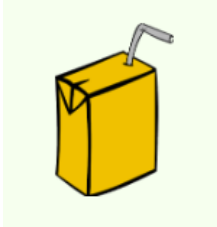

The **image collection** you are borrowing elements from is as follows:

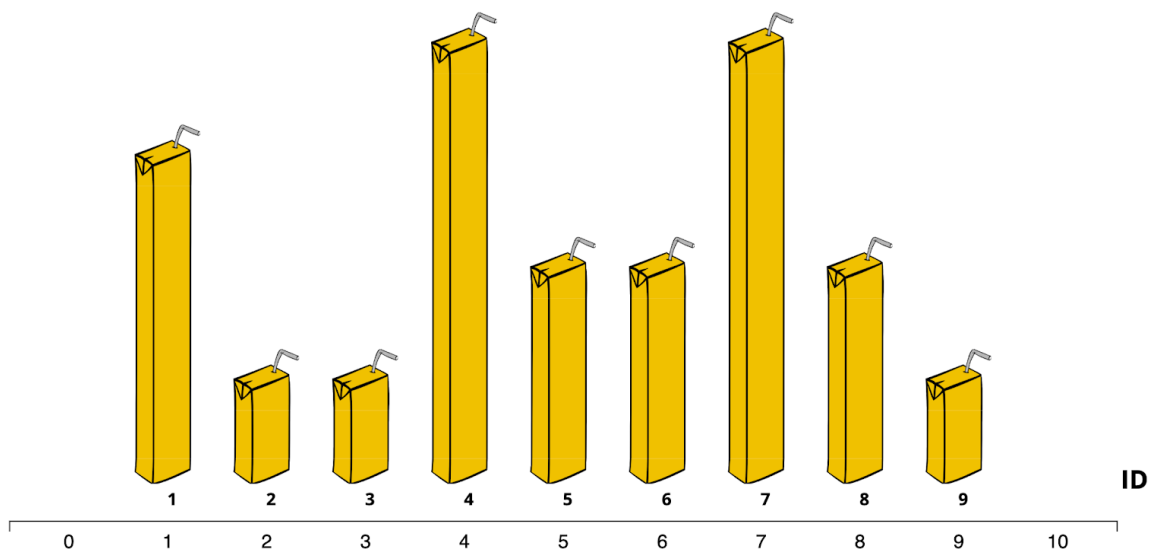

INSTRUCTIONS

Change the visualization so that each juice in the dataset corresponds to a juice box, whose **height** represents the **amount of sugar**. The top and bottom part of the juice box should not appear to be stretched. Organize the elements so that they are **vertically aligned**, and **evenly spread horizontally** by ID.

TARGET VISUALIZATION

The **target visualization** you are asked to replicate is as follows:

Let the experimenter know when you are done with this exercise.
